Subject Index of Volume 49

Adsorption

- gas holdup and volumetric liquid phase mass transfer coefficients in a downjet loop reactor, 49
- appareil pour la mesure thermique de la cinétique d'adsorption, 11

Agitation

- effect of addition of alcohol on the design parameters of mechanically agitated three-phase reactors, 107

Alcohol

- effect of addition of alcohol on the design parameters of mechanically agitated three-phase reactors, 107

Alumina

- étude d'une réaction catalytique en présence d'un rayonnement microonde, 79

Aluminium

- effect of catalyst preparation in the Ni-Al₂O₃ poisoning by thiophene, 45

Axial dispersion

- on the constancy of axial dispersion coefficients in liquid fluidized beds, 17

Biokinetics

- biokinetics of wastewater treatment in the high performance compact reactor (HCR), 1

Bioreactors

- modelling of air-lift fluidized bed: optimization of mass transfer with respect to design and operational parameters, 89

Boundaries

- gas-liquid flows in cylindrical venturi scrubbers: boundary layer separation in the diffuser section, 55

Bubble formation

- bubble formation at closely spaced orifices in aqueous solutions, 65

Bubble size

- gas-liquid bioreactors: maximum stable bubble size, 13

Catalysts

- membrane reactor with two dispersion-free interfaces for homogenous catalytic reactions, 35
- effect of catalyst preparation in the Ni-Al₂O₃ poisoning by thiophene, 45
- étude d'une réaction catalytique en présence d'un rayonnement microonde, 79

Chlorides

- système quinaire H₂O-NaCl-CaCl₂-SrCl₂-BaCl₂: exploitation de l'isotherme 65 °C en vue de l'extraction des chlorures de baryum et de strontium, 167

Chromatography

- effects of denaturation in the displacement chromatographic behaviour of proteins, 29

Coalescence

- study on a new type of mixer-settler, 127

Computer analysis

- détermination de la distribution granulométrique de milieux dispersés liquide-liquide, solide-liquide et solide-solide: mise au point et développement de l'analyse d'image assistée par ordinateur, 141

Condensation

- model of temperature profiles during condensation in a film in a molecular evaporator, 177

Denaturation

- effects of denaturation in the displacement chromatographic behaviour of proteins

Diffusion

- theory of transport phenomena in disordered systems, 1

Dipeptides

- separation of dipeptides on reverse-phase column: effect of non-linear intrinsic adsorption kinetics, 41
- gas-liquid flows in cylindrical venturi scrubbers: boundary layer separation in the diffuser section, 55

Distribution

- détermination de la distribution granulométrique de milieux dispersés liquide-liquide, solide-liquide et solide-solide: mise au point et développement de l'analyse d'image assistée par ordinateur, 141

Electrolytes

- bubble formation at closely spaced orifices in aqueous solutions, 65

Electroplating

- modelling of a rinsing process in electroplating lines, 161

Extraction

- système quinaire H₂O-NaCl-CaCl₂-SrCl₂-BaCl₂: exploitation de l'isotherme 65 °C en vue de l'extraction des chlorures de baryum et de strontium, 167

Fermentation

- modelling of air-lift fluidized bed: optimization of mass transfer with respect to design and operational parameters, 89
- theoretical approach to the evaluation of the effectiveness factor in an entrapped yeast cell column, 23

Film

- simultaneous mass and heat transfer with reaction in multicomponent, laminar, falling liquid film, 119

Films

- model of temperature profiles during condensation in a film in a molecular evaporator, 177

Fluidized bed

- modelling of air-lift fluidized bed: optimization of mass transfer with respect to design and operational parameters, 89
- on the constancy of axial dispersion coefficients in liquid fluidized beds, 17

Fractals

- theory of transport phenomena in disordered systems, 1

Gas

- gas holdup and volumetric liquid phase mass transfer coefficients in a downjet loop reactor, 49
- gas-liquid flows in cylindrical venturi scrubbers: boundary layer separation in the diffuser section, 55

- Gas phase**
 gas phase holdup in slurry columns for two- and three-phase systems, 151
- Gas-liquid bioreactors**
 gas-liquid bioreactors: maximum stable bubble size, 13
- Gas-liquid-solid**
 effect of addition of alcohol on the design parameters of mechanically agitated three-phase reactors, 107
- Granules**
 détermination de la distribution granulométrique de milieux dispersés liquide-liquide, solide-liquide et solide-solide: mise au point et développement de l'analyse d'image assistée par ordinateur, 141
- Heat exchange**
 gas phase holdup in slurry bubble columns for two- and three-phase systems, 151
- Heat transfer**
 simultaneous mass and heat transfer with reactions in multicomponent, laminar, falling liquid film, 119
- High performance compact react**
 biokinetics of wastewater treatment in the high performance compact reactor (HCR), 1
- Interfaces**
 membrane reactor with two dispersion-free interfaces for homogenous catalytic reactions, 35
- Isothermal**
 modelling of the isothermal oxidative stabilization of mesophase pitch fibre, 133
- Kinetics**
 appareil pour la mesure thermique de la cinétique d'adsorption, 11
 biokinetics of wastewater treatment in the high performance compact reactor (HCR), 1
 kinetics of the alkaline nitrobenzene oxidation of lignin in rice straw, 17
 separation of dipeptides on reverse-phase column: effect of non-linear intrinsic adsorption kinetics, 41
 theoretical approach to the evaluation of the effectiveness factor in an entrapped yeast cell column, 23
- Lignin**
 kinetics of the alkaline nitrobenzene oxidation of lignin in rice straw, 17
- Lydersen method**
 again the Rackett equation, 27
- Mass diffusion**
 appareil pour la mesure thermique de la cinétique d'adsorption, 11
- Mass transfer**
 gas holdup and volumetric liquid phase mass transfer coefficients in a downjet loop reactor, 49
 modelling of air-lift fluidized bed: optimization of mass transfer with respect to design and operational parameters, 89
 simultaneous mass and heat transfer with reactions in multicomponent, laminar, falling liquid film, 119
- Membranes**
 membrane reactor with two dispersion-free interfaces for homogenous catalytic reactions, 35
- Mixer-settler**
 study on a new type of mixer-settler, 127
- Modelling**
 modelling of a rinsing process in electroplating lines, 161
- Molecules**
 again the Rackett equation, 27
- Nitrogen**
 effect of catalyst preparation in the Ni-Al₂O₃ poisoning by thiophene, 45
- Ores**
 système quinaire H₂O-NaCl-CaCl₂-SrCl₂-BaCl₂: exploitation de l'isotherme 65 °C en vue de l'extraction des chlorures de baryum et de strontium, 167
- Orifices**
 bubble formation at closely spaced orifices in aqueous solutions, 65
- Oxidation**
 étude d'une réaction catalytique en présence d'un rayonnement microonde, 79
 kinetics of the alkaline nitrobenzene oxidation of lignin in rice straw, 17
- Oxygen**
 effect of catalyst preparation in the Ni-Al₂O₃ poisoning by thiophene, 45
 gas holdup and volumetric liquid phase mass transfer coefficients in a downjet loop reactor, 49
 modelling of the isothermal oxidative stabilization of mesophase pitch fibre, 133
- Proteins**
 effects of denaturation in the displacement chromatographic behaviour of proteins, 29
- Rackett equation**
 again the Rackett equation, 27
- Redox potentials**
 application of redox potentials in the selection of reducing agents for vat dyes, 73
- Reduction**
 application of redox potentials in the selection of reducing agents for vat dyes, 73
- Rinsing processes**
 modelling of a rinsing process in electroplating lines, 161
- Scattering**
 study on a new type of mixer-settler, 127
- Silica**
 separation of dipeptides on reverse-phase column: effect of non-linear intrinsic adsorption kinetics, 41
- Slurry bubble columns**
 gas phase holdup in slurry bubble columns for two- and three-phase systems, 151
- Solutions**
 bubble formation at closely spaced orifices in aqueous solutions, 65
- Stabilization**
 modelling of the isothermal oxidative stabilization of mesophase pitch fibre, 133
- Temperature**
 model of temperature profiles during condensation in a film in a molecular evaporator, 177

Thiophene

effect of catalyst preparation in the Ni-Al₂O₃ poisoning
by thiophene, 45

Time distribution

on the constancy of axial dispersion coefficients in liquid
fluidized beds, 17

Transport

theory of transport phenomena in disordered systems, 1

Vat dyes

application of redox potentials in the selection of reduc-
ing agents for vat dyes, 73

Yeast

theoretical approach to the evaluation of the effectiveness
factor in an entrapped yeast cell column, 23
